

ECOLOGIC DAO ORACLE

a painting

after Jaël

This ecologic oracle is based on the DAO TEH JING
also known as the TAO TE CHING. This ancient Chinese text has 81 verses :
<http://www.taoteching.org>

In this book these 81 verses are condensed to
45 Jaël verses: pages 30 to 35 and 36 Taru Images: page 36

Let us start with the cover : the image of the Butterfly
is drawn with digit 7

TREE

health, cure

*Double wisdom
leads to learning possibilities.
This is known
as the balance from Earth.
Knowing this is
being one with eternity.
What is against Jaël
becomes extinct!*

*Jaël brought about the one.
One brought about the two.
Two brought about the three.
Three brought about the structures.
The wise call themselves
lonely and needy because
true diminishing leads
to expansion...*

*A tree as big
as an armly embrace
flourished from a twig.
He who grabs, loses...
He who acts, fails...
The wise does not act
and fails not, does not grab
and loses not!*

How to communicate with Nature

North-West Europe in pre-Christian society had the Druids. They were “seers” and spiritual leaders who promoted a close bond between humans, trees, water and animals. They are presumed to be the first to use a rock crystal quartz as a divination tool. They called this quartz : the stone of the Sun.
Rock crystal is a pure Quartz mineral (petrified water that is a million years old)
It is transparent, colorless and shaped as a 6-sided prism.

In some western languages there are still references to these practices:

Greek : *krystallos* : purified frozen water

English : *crystal clear* : completely clear and understood

Swedish : *kristalklar* : completely clear and understood

Dutch : *zonneklaar* : so obviously true

How to make your own rock crystal pendulum:

Surf the net or shop to purchase a piece of pure transparent rock crystal quartz (diameter 3 centimeter)

Make a pendant : use paper tape to wrap around the stone, leave about 3 centimeter of tape sticking out at the top and make a hole in the tape to thread and attach a piece of string through it. (length about 20 cm).

It is important that there are no metals attached to the pendulum and remove rings, bracelets and wristwatch on the hand that holds it .

How to use your own rock crystal pendulum:

Sit in a comfortable position and hold the pendulum between thumb and first finger.

Hold it still. (It helps if your elbow is against your body)

Concentrate and ask mentally a question:

if the pendulum turns clockwise the answer is negative

if the pendulum turns anticlockwise the answer is affirmative

The rock crystal pendulum explains itself:

Ask me mentally a question :

to communicate i prefer a dictionary

that uses example sentences to explain the words.

Ask me first if the page number that you have to look up is above page 1000.

Ask then plus or minus 100. When you know the hundreds, ask: above 50?

Ask then plus or minus 10. When you know the decades

ask if digit is above 5. Ask then plus or minus 1. Look up page nr and ask which word i want you to look at.

This may seem an elaborate method but ones you have mastered it, it takes about a minute to know the word or sentence that is your answer

This example of a reading is obtained with the
Longman Dictionary of Contemporary English, edition 2003

The pendulum explained that it did not like
the term “radiesthesia: to receive information with a dowsing rod or pendulum
[compound of the prefix radi(o)-, referring to radiation and the rare term aesthesia
meaning "perception by the senses", or "the capacity for feeling or sensation", which
comes from the ancient Greek aisthesis "a perceiving"]].

It explained that the movements of the pendulum
have nothing to do with radiation nor with the senses of the user...

It guided me towards a new verb : “**to penpoint**”

page 1215 : left column : **Pen** & page 1260 : right column : **Point**

definition :

page 590 : right column: Word : Filing :

use part of the sentence : “ **The work of arranging**” & “**and**”

page 713 : left column: Word : Grind out :

use part of the sentence : “ **... to produce information**” &

“with a rock crystal pendulum”

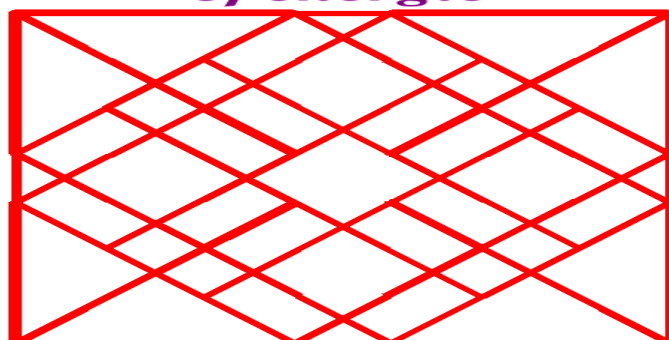

Search the Internet using the penpoint method: Words : “ecological” & “foot”

hit : The importance of Living an Ecological Life:

Ever wondered how much “nature” your lifestyle requires? You are about to find out...

the 45 JAEL – Verses

1

*To fullie comprehend the eternal beautie of this origin,
fill the self with consciousness.*

2

*Simplicitie is the basis of honour.
Low the foundation of height.
Therefore the wise call themselves lonelie and needie.
Isn't it because honour is the base of simplicitie? So, isn't it?
Jou mai name each part of a vehicle and still have no vehicle!
Therefore it is better to follow the rock-cristal than to sound like silver or gold.*

3

*The linx goes forward but seems to fall back. The taru are regular but seem uneven.
The finest music has the soffest sound. The greatest figure has no shape.
Jaël is hidden for the eie,
but onlie Jaël accomplishes all tasks and satisfies all needs.*

4

*The return is the understanding of the taru. Irregular is the working of the linx.
All things in the world come from being and being comes from non-being...*

5

*Jaël brought about the one. One brought about the two. Two brought about the three.
Three brought about the structures.
The wise call themselves lonelie and needie because true diminishing leads to expansion...*

6

*This shall be the foundation of mai teachings:
the natural thing shall win over the silver and the golden thing.
Non-being even flows where there is no space...So i know the advantage of being natural.*

7

*What do we love most: fame or our life?
What is more harmful: gain or loss? What is more precious: life or wealth?
Who cherishes costlie needs, shall lose great sums. Who gathers most, shall have the greatest losses.
Who is satisfied, suffers no humiliation.
Who knows when to stop meets no danger and shall remain for a long time.*

8

*Hastie movements over win coldness but through pureness one over wins heat
and walks at ease on a planet without bounderies!*

11	<p><i>Double wisdom leads to learning possibilities.</i></p> <p><i>This is known as the balance from Earth.</i></p> <p><i>Knowing this is being one with eternitie.</i></p> <p><i>What is against Jaël becomes extinct!</i></p>

14	<p><i>To know is to balance jour earthlie nature and cosmic nature,</i></p> <p><i>therebai transforming through mixing the five elements!</i></p>

*At times when armies are formed
and the threats begin,
i can lose mai treasures.
Therefore, he who retreats from the verie start
shall be victorious in the battle...*

19

The wise carries his rock-cristal under a coarse coat!

20

*The usefulness of the natural wai
is seeing innerlie clear
and sleep in responce with the earth asilum...*

21

*The wise who is one with Jaël
investigates dailie to increase his cosmic knowledge!*

22

*Sound and voice form from one and other.
That is whai a wise acts through non-acting
and proclaims without speech.
He accomplishes his tasks but does not claim the credit
and so he does not lose what belongs to him!*

23

*The earth asilum is like a matrix.
Jou can pour out of it endlesslie.
It is deep, peaceful and full with earth's healing.*

24

*The wise who is concerned in loving his self
knows that the power of words perishes...
So, it is better to return, again and again,
to the centre of everiething!*

25

*The cosmos is eternal and the earth is permanent
because thei do not exist for themselves.
So also, places the wise his self behind, but still remains on the foreground.
He withdraws, but still is present.
Isn't it because he does not cherish self-importance that his needs are satisfied?*

26

*In his living, he loves the earth. In his heart, he loves seriousness.
In his solidaritie, humanitie. In his words, fidelitie.
In his business, abilitie. In his government, order.
In all his doings, timeliness.
Because he does not compete, he is spotless...*

27 *A bowl fullie filled is difficult to handle.
 Therefore, it is better to stop in time.
 When gold and silver fill jour hall,
it is difficult to guard them. Fame and wealth bring pride.
 These things make jou fall...
 To stop when the work is done,
 is the wai of the taru.*

28 *Can jou maintain jour self and embrace the one without leaving one?
 Can jou reïnförce jour strength
 and behold jour childlike innocence?
 Can jou refine jour visions and mirror the truth?*

29 *Above no shining, no darkness below. Eternal and endless,
 it goes back to where is nothing.
Go towards it and jou don't see a front.
 Follow it and jou don't see a back!
 But explore it and each dai shall be a new one...*

30 *Who can like troubled water, become progressivelie clear again?
 Who can from stillness become progressivelie alive again?
 Who follows Jaël shall not overfill the self.
 Because of this, he never gets less and needs no renewal!*

31 *The return is called the everlasting. Knowing this is enlightenment.
 Not knowing this is blindness, which leads to disaster.
Knowing is being one with the reflection. Decai of the bodie is not dangerous...*

32 *If a planet is ruled following the power of the taru,
 it shall lose its supernatural power.
 Not that it shall lose its spiritual powers,
 but the powers shall be in accord with its people
 and the wise shall be in accord with them.
 Then both shall gather abilities from which all will benefit...*

33 *A wise does not boast and so gains confidence. He does not get in front and so obtains light.
He does not justifie himself and so gets esteem. He does not overdo aniething and so is durable.
 Because he does not compete shall no one challenge him.
 And so he shall preserve and what belongs to him, shall come to him!*

34

*Nature needs little words.
A tornado doesn't last all morning.
Heavie showers don't last all dai...
What causes them than nature itself?
If the Cosmos and the Earth can't let it last all dai,
lesser still can a human do this!*

35

*In the beginning there was something.
It calls itself Jaël. Should i describe it, i call it omnipotence.
The Cosmos is great and the Earth is great and the wise is great.
There are four great things and the wise is one of them.
Because a wise addresses himself to the earth asilum.
The earth asilum addresses itself to the Linx.
The Linx addresses itself to Jaël
and Jaël addresses to one self.*

36

*Who can emploi his own excess
for the well-being of everiething?
Onlie he that follows with belief.
So, the wise acts without lust for result.
He shall not proclaim his greatness...*

37

*The linx proceeds from correlative lines & circles
and its might is in following...*

38

*Who is one with Jaël uses no violence,
because this brings a reaction.
A wise accomplishes his tasks,
but is not proud of it.
He accomplishes without boasting
and because there was no other wai.
Things that attain their climax set in their own decai.
This is against Jaël and what is against Jaël becomes extinct...*

*Who follows Jaël shall not use weapons:
a wise honours the earth asilum.
Onlie in wartimes the texts.*

39 *When a wise must use them, he shall be reserved.
When he obtains a victorie, he shall not praise it!
Praising a victorie is to enjoi the slaughtering of people.
Who enjois this shall not succeed in this realm...*

40 *The oneness of jaël seems little but no one challenges it.
If the world should hold on to it, all things would change themselves.
The Cosmos and the Earth meet to make sweet dew
and without human hands, thei fall everiewhere...*

41 *Who knows others is wise. Who knows himself is enlightened.
Who wins over others is strong.
Who wins over himself has willpower. Who preserves his place is durable.
But who follows Jaël, does not become extinct
and has a long existence!*

42 *Jaël flows everie where. All things depend on it
and it does not turn awai of anie of them...
Therefore, the wise does not aim for the great
and so achieves the greatest.*

43 *Hold on to the great beginning and visitors shall come
to meet no danger but warmth, peace and health.
Non-conformed food and drinks onlie cause passengers to stop.
But live bai the law of the one and its power shall make jou free.*

44 *To diminish, jou first have to expand.
To soften, first strengthen. To slope, first build.
To give, first take...
This is called the secret light
and it is the reason whai fish need water.*

45 *The everlasting Jaël does not act and still it leaves nothing undone.
If the world should hold on to it, all things would obei
and change themselves. If after this change thei wanted to act,
i would urge them to be nameless and simple!*
